Harborline Cloud Services — Backup and Disaster Recovery Proposal

Prepared for: Northbridge Industries, IT Operations
Reference: RFP "Data Backup and Disaster Recovery"
Contact: Taylor Brooks, Enterprise Account Manager — proposals@harborline.example — +1 415 555 0142

1. Overview

Harborline offers HarborSafe, a cloud backup and recovery service covering servers, databases and SaaS applications. We propose protection for all 40 production servers and 12 databases with daily backups and a cloud recovery environment.

2. Service description

Backups run once per day at 01:00 local time. Retention is 30 days for daily backups. Recovery is performed by the Harborline operations team on request through the support portal.

For redundancy, backup copies are replicated to a secondary data centre in Virginia, USA. The primary copy is held in Amsterdam.

3. Service levels

Measure	Commitment
Recovery time objective (RTO)	8 hours (best effort)
Recovery point objective (RPO)	24 hours
Availability	99.5% monthly
Support	Business hours, Monday to Friday, 08:00–18:00 CET; 24/7 support is an optional add-on at USD 9,000 per year
DR testing	One recovery test per year; additional tests charged at USD 2,500 each

Service credits are limited to 5% of the monthly fee and are the customer's sole remedy for service failures.

4. Pricing

Component	Price (USD)
HarborSafe backup — 40 servers, 12 databases	49,500 per year
Cloud recovery environment	15,000 per year
One-off setup and onboarding fee	8,500
Total first-year cost	**73,000**

The full annual fee is payable upfront within 14 days of invoice. Storage above 50 TB, data egress and restore operations are billed separately as additional fees at the rates published on our website.

5. Contract terms

The initial term is 36 months. The agreement renews automatically for successive 12-month terms unless cancelled in writing at least 90 days before renewal. Prices may be revised at each renewal at Harborline's discretion. Early termination requires payment of all remaining fees for the current term.

Harborline's total liability under this agreement is capped at the fees paid in the preceding one month. Harborline is not liable for any loss or corruption of customer data.

6. Data protection

Data is encrypted at rest and in transit. Harborline will notify the customer of a confirmed security incident within 7 business days. Sub-processors may be changed without prior notice.

7. Implementation

Onboarding takes approximately 10–12 weeks from signature, depending on customer readiness.
