Summit Data Systems — Data Backup and Disaster Recovery Proposal

Prepared for: Northbridge Industries, IT Operations
Reference: RFP "Data Backup and Disaster Recovery"
Contact: Casey Nguyen, Senior Solutions Consultant — bids@summitdata.example — +44 20 7946 0321
Proposal valid for 90 days from submission.

1. Executive summary

Summit Data Systems proposes a fully managed backup and disaster recovery service for Northbridge's 40 production servers and 12 databases. Backups are immutable, stored in two EU data centres (Frankfurt and Dublin), and recovery is tested every quarter with a written report. We commit to a 2-hour recovery time objective (RTO) and a 15-minute recovery point objective (RPO), both better than the RFP requirement.

2. Company profile

Founded in 2009, Summit employs 340 people and protects more than 1,100 business customers across Europe. We hold ISO/IEC 27001:2022 certification and a SOC 2 Type II report (issued March 2026), both available under NDA.

3. Solution scope

Item	Included
Servers protected	40 production servers (Windows and Linux), image-level and file-level
Databases protected	12 databases (SQL Server, PostgreSQL), transaction-log backups every 15 minutes
Retention	Daily for 35 days, weekly for 12 weeks, monthly for 12 months
Immutability	Write-once storage lock for 30 days (ransomware protection)
Disaster recovery site	Warm standby in Dublin, failover runbook maintained jointly

4. Service levels

Measure	Commitment
Recovery time objective (RTO)	2 hours for tier-1 systems, 4 hours for all others
Recovery point objective (RPO)	15 minutes for databases, 1 hour for servers
Backup success rate	99.5% of scheduled jobs per month
Service availability	99.95% monthly for the backup portal and APIs
Support	24/7/365 by phone and portal; 30-minute response for priority 1 incidents
DR testing	Quarterly full recovery test with a written report within 5 business days

Service credits: 10% of the monthly fee for each missed RTO, RPO or availability target, capped at 30% of the monthly fee.

5. Commercial proposal

Component	Annual price (USD)
Managed backup — 40 servers, 12 databases	38,400
Disaster recovery standby and quarterly testing	14,400
24/7 support and named service manager	6,000
Total annual price	**58,800**

One-off onboarding fee: none. Payment terms: invoiced monthly in arrears, net 30 days. Prices are fixed for the initial term; any increase at renewal is capped at 3% per year.

6. Contract terms

Initial term: 24 months. The contract does not renew automatically; renewal is agreed in writing at least 60 days before the end date. Either party may terminate for convenience with 90 days' written notice after the first 12 months.

Liability: each party's total liability is capped at 12 months of fees. The cap does not apply to data protection breaches or confidentiality obligations.

7. Data protection and security

All customer data stays in the EU (Frankfurt primary, Dublin secondary) and is never transferred outside the EU. Data is encrypted at rest with AES-256 using customer-specific keys and in transit with TLS 1.3. We act as data processor under a GDPR Article 28 data processing agreement and will notify Northbridge of a personal data breach within 24 hours of discovery.

8. Implementation timeline

Week 1–2: discovery and agent deployment. Week 3–4: first full backups and retention policies. Week 5: first DR failover test. Week 6: handover and sign-off. Total: 6 weeks from contract signature.
